

G-R-E-A-T Grand River Trip #3

- 1 Small parking area on the south side of Jefferson Rd. with access to the river.
- 2 Low bridge over river, you may need to portage.
- 3 A covered bridge. You may need to portage.
- 4 Small bridge you may need to portage.
- 5 At Reed Road there are two culverts under the road, the left is usually the best choice.
- 6 Get out of the river at the highway bridge. The West side of the bridge might be best if your vehicle is in Austin Blair Roadside Park just south of here.
- 7 Austin Blair Roadside Park (west side of highway south of Grand River) would be a good place to park and not too far from the take out. Parking along the highway would not be wise.

This trip is just about 5 miles and depending upon water levels can be done in a couple hours. A nice paddle through mostly marsh lands with a few woods.
